Lowell’s Heavy Gear Series, Activision’s MechWarrior.? Way back in 1982, when we were just beginning to learn about game development, developing for video games seemed to be a relatively easy and simple process. Making your own game from scratch? Sure, that could be done. But as time passed and technology improved, the idea that a small studio or even one individual could make a video game, and produce something that could rival, if not surpass, the latest best sellers, seemed utterly ridiculous. The fact is, it was never just about the games themselves; it was also about the size of the companies involved. The largest, biggest companies, could afford to buy their own technology, and hire a team of programmers and artists to churn out a game (at a great cost) and have them make changes to suit their needs. They could also afford to print off thousands of copies of their game and have them distributed to

the millions, so that people could play them and, more importantly, buy them. It was a very different time and a very different industry. Smaller, more obscure titles (think “The Toys”) faced the problem of having to justify selling enough copies to break even. At the same time, developers were not in it for the money; it was only because making games was their passion. So they made games on a shoestring budget, sometimes by a one or two man team. Whatever you thought of their games, they 6d1f23a050
