Ã¢â‚¬Â¦Q: Webpack with react and babel 6 I have a simple react app that I would like to migrate to using webpack and babel 6. I have the webpack configuration all setup and I'm using webpack-dev-middleware to serve up the app, so when I visit localhost:8080 everything works as expected. When I navigate to the localhost:8080/a/b/c and try to hit a route that imports React from node_modules it crashes the server and I get a webpack error and it looks like webpack has not finished processing all of the js. I'm wondering if I need to add babel-loader for this, but I am stuck on how to get that configured, I have tried the following test/server/webpack.config.js var webpack =
