Anti Virus Scanner For .NET Crack Product Key Download X64

The library is a wrapper of virusscanner that can be installed on Windows OS. The virus-scanning is done by the OS's built-in anti virus. When the.NET programmer wants to scan a file by virus scanner, she just does not tell the scanner to scan the file, but tells the library. You will find this framework handy especially when you install anti virus software products on your Windows OS and the anti virus reports you detected any suspicious files. You can do the following things with this library: 1. Scan any file by virus scanner; 2. Dynamically change the types of the file being scanned; 3. Dynamically change the number of files being scanned; 4. Scan file by idispatch object; 5. Scan file by language; 6. Scan subdirectories by language; 7. Dynamically change the file type being scanned; 8. Dynamically change the virus type being scanned; 9. Dynamically change the scan method (verify, scan, recursive, preset, cpu); 10. Dynamically change the scan depth (auto, from 1st level subdirectory, subdirectory); 11. Set the scan interval; 12. Generate the report of the scan; 13. Set the scan time; 14. Dynamically change the file scanner (you can set the virus scanner for the file, and the file being scanned). The library also provides all the properties of the viruses and the scanners. So, you can use these properties to dynamically change the settings when you want to scan a file. Using Anti Virus Scanner for.NET: You can do the following things with the library: 1. Scan a file with the virus scanner specified by IDispatch. 2. Scan a file with the virus scanner specified by the specified virus type. 3. Scan a file with a specified virus scanner. 4. Scan any number of files with the virus scanner specified by IDispatch. 5. Scan a file with the virus scanner specified by the specified virus type. 6. Scan a file with the specified virus scanner. 7. Scan a file with the specified virus scanner and return the scanned result by verifying the result, processing the result (you can check whether the virus scanner found any viruses, processes the viruses, record the detected viruses, generate the report of the detected viruses, etc.), processing the result and the report of the process (the result of the process and whether the

Anti Virus Scanner For .NET Crack [Mac/Win]
