Applications of AutoCAD can be broadly categorized as schematic design, structural design, programming, production, and rendering. AutoCAD is primarily used to design industrial and engineering products. AutoCAD is the most popular CAD software for architectural, engineering, and construction industries worldwide. Awarded the National Medal of Technology by President Clinton in 1993, the company's founder, Ralph H. Baer, received the National Medal of Technology and Innovation by President Obama in 2012. AutoCAD history Origin AutoCAD is the successor of a CAD system called DAVE, which was developed in 1977 by Dr. Ralph H. Baer at the National Center for Supercomputing Applications (NCSA) at the University of Illinois at Urbana-Champaign. Release AutoCAD was first released in December 1982 as a desktop app running on microcomputers with internal graphics controllers. Its first major release was AutoCAD release 1.0. On January 22, 1985, AutoCAD 2.0 was released, containing a basic plotting capability. In 1986 AutoCAD Lite was released for Macintosh as well as MS-DOS. 3D AutoCAD 3D was first released in 1991. It included point, line, and area 3D modeling, sectioning and drafting, space selection, and automated plotter path feature. AutoCAD 3D is the basis for all subsequent releases of the software. AutoCAD 2004 AutoCAD 2004 (formerly AutoCAD LT, Autodesk LT, A360, and Autodesk 360, and other names) is an office and architectural CAD program from Autodesk. It was first introduced in June 2004. Among the features introduced in AutoCAD 2004 are a new drawing interface, improved 2D plotting tools, improved 2D and 3D modeling tools, extensive engineering functionality, higher levels of integration with AutoCAD 2005 and earlier, and a desktop module for AutoCAD 2004 that includes several new tools and features. AutoCAD 2008 AutoCAD 2008 (formerly AutoCAD 2008 SP1 and Autodesk 2008) is a successor of AutoCAD LT, and was first introduced in June 2008. AutoCAD 2008 includes new features, such as a new drawing canvas, new 2D and 3D modeling tools, new time-saving features, a new axis system, and greater integration with AutoCAD 2007

Dr. Lawrence Khong had earlier won an appeal against a High Court ruling that he had to answer five questions in a civil suit brought by Siti Aisyah, one of three women who were each given \$50,000 in damages by a Malaysian court for being hired by a North Korean agent to stage an assassination attempt on Kim Jong Nam, the half brother of North Korean leader Kim Jong Un. Khong had argued that he was a British citizen and therefore his statements should be considered "political speech," exempting him from answering questions. The High Court said the evidence presented did not show that the doctor's statements were political and that he had to answer the questions. "We don't agree with the court's a1d647c40b
