The Concise Oxford English Dictionary and Thesaurus, published in 1992, is a revised version of A Concise Oxford Dictionary of Current English. A full English thesaurus is included with the dictionary. The dictionary is published for OUP by Oxford University Press, and is a comprehensive and authoritative reference work covering almost a century of

---

English vocabulary. It contains a choice selection of words and phrases, many illustrated and glossed. The dictionary is particularly well-suited to the needs of students, teachers, business people, and non-native speakers. The Concise Oxford English Dictionary and Thesaurus is not a replacement for other dictionaries, including The Oxford Dictionary of English, but rather an addition to the lexicographical armory, to

---

be consulted alongside other reference works. Appendices: a. A full thesaurus including synonyms, antonyms, hyponyms, meronyms and hypernyms. b. Biographical and historical information about the editors and their work. c. A list of abbreviations and acronyms used in the dictionary.

English languageQ: How to select multiple items from a form I have a form that looks like this: I'm looking to have the user be able to select multiple rows, which would allow them to see all of the rows for each question and then when they press "submit", it would select all of the rows for the question and then print out all of the information (I know the code I have for selecting the rows is not ideal, but I'm not sure what

---

else to do). Here is the javascript/jQuery I'm currently using:

```
$(document).ready(function() {  
  $('form#solutions  
form').submit(function() { var  
    $rows = $(this).find('.row'); var  
    answerArray = [];  
    $rows.each(function() { var  
      currentRow = $(this); currentRo  
w.find(':text').each(function() {  
      answerArray.push($(this).val());
