Trade Control Utility Crack + Free License Key Free Download

Trade Control Utility (TCU) allows you to receive, record, store, evaluate and deliver your goods, as well as to make instant deals with various buyers and sellers. General Description: Utility for accounting and analyzing trading activities. Can be used as a standalone software or can be extended with other modules: Hand held support, internet support, offline support. Storage and storage devices : Trade Control Utility can be used on any type of storage devices: disk, hard drive, flash or memory card. Trading and trading activities: TCU can be used in a stand-alone mode, it can also be extended with other modules that we make available. When trading and market information is important for your activity, you need to work with various different products and it can be difficult to keep them all in a single document. TCU provides tools for collecting orders using handheld (PDA, PocketPC) and Internet. Billing and Receiving: In your business, payment and receiving of goods must be combined with the trade. In case you need to hold an inventory, and you need to perform trade on a regular basis, you will also have to make reports for invoicing and other activities. Components: InTrade is made of five components: Order/Payment/Shipment/Billing/Receiving/Trade Statistics. Order and Payment components: Order and Payment components are used to record purchase orders and pay suppliers. The component allows to set a few parameters (Date/Time, Amount, Unit, Shipping Method, etc.) that will be stored in the record, to simplify the search. It also makes it possible to associate the record with a client. Shipment component: When you receive a shipment, you must record in your business accounting. You can use the component to record your shipment of a purchase order in the order record of your storage unit. Billing and Receiving component: You will need a tool to manage the list of orders that you receive and pay, as well as to prepare invoices to send to your clients. The component allows to record orders received and paid, and to prepare the invoice to send to the client. Trade Statistics component: Trade Statistics component is used to calculate the statistics related to your business: average cost of goods, order rate, sales rate, average income, revenue, total sales. It also allows you to record your cost and income. Utility for accounting and analyzing trading activities is efficient

Trade Control Utility Activation Code [Updated]
