I found this problem solution here: This seemed like a quick fix and I have been using this fix for a few months now. I am using laravel 5.2. When I try and access the auth class the following error comes up: Class 'App\Http\Controllers\Auth\Access' not found When I check the classes directory in the vendor folder I have these classes: C:\laragon\www\myproject\vendor\laravel\framework\src\Illuminate\Foundation\Auth\Access C:\laragon\www\myproject\vendor\laravel\framework\src\Illuminate\Foundation\Auth\Access\Access.php C:\laragon\www\myproject\vendor\laravel\framework\src\Illuminate\Foundation\Auth\Access\AuthorizesRequests.php C:\laragon\www\myproject\vendor\laravel\framework\src\Illuminate\Foundation\Auth\Access\AuthenticatesUsers.php C:\laragon\www\myproject\vendor\laravel\framework\src\Illuminate\Foundation\Auth\Access\RulesRequests.php C:\laragon\www\myproject\vendor\ 09e8f5149f

What's New in the File Time Changer?

File Time Changer is designed to help you easily modify file times. It allows you to modify the times of files that the OS use to calculate the length of the file and the time it was last modified. You can use File Time Changer to modify any file creation, last access and last modified times. File Time Changer works by using the DOS and the Windows API and will modify the required times without affecting other system programs. Changes are made only for the target file and all other files are not touched. Apart from that all operations use system calls that won't affect system stability and won't create any problems for the system. File Time Changer is a freeware application and is compatible with Windows 2000, Windows XP and Windows Vista. File Time Changer has been tested in Windows 7 and has also been tested on Windows 8. File Time Changer Features: Let's take a look at some of the features that File Time Changer offers you: File Time Changer Features: 1. View file access, creation, last modification and last access times for any file. 2. Enable and disable time viewing for your applications. 3. Date and time change operations are done in real-time. 4. Works only for files that can be accessed using the Windows API 5. Works without any system's stability problems. 6. There is a help file included in the download so you can read information about the application, as well as the installation instructions. 7. The program runs smoothly and is compatible with Windows 2000, Windows XP and Windows Vista. 8. Compatible with any version of Windows. 9. Requires only a few MB of free hard-disk space. 10. You don't need any additional programs to work with the program. 11. Free to download and use. What's New: Slight changes to the application's interface and settings. File Time Changer Changes: 1. The date and time change operations are now made through a form. 2. The program now has a simplified interface to help you make the most out of the program. 3. Reorganizing the main window and the main menu. 4. Customizing the program's interface on any PC. File Time Changer Help File: File Time Changer Help File Description: 1. This is the document that was included in
