Turn local files, YouTube videos and SoundCloud music into ringtones EaseUS Ringtone Editor allows you to create a ringtone for your iPhone in a few simple steps. It provides compatibility with common media formats, such as MP4, MOV, FLV, AVI, 3GP, WMV, MKV and WebM. What is more, it allows you to search for music online on two of the most popular content sharing websites, namely YouTube and SoundCloud. In other words, you should be able to create a ringtone out of any music file you can think of. Customize the ringtone with sound effects Once you select the source file, the next step of

the wizard requires you to clip the music file within 20 seconds, to fit the ringtone size. At this point, you basically must choose your favorite track section. EaseUS Ringtone Editor comes with playback support, allowing you to listen to the loaded song before selecting the fragment you prefer. Next come the ringtone effects. To make the sound fade in or out, you must swipe left or right, whereas swiping up and down affects the sound volume. It is worth mentioning that additional effects can be added to the ringtone, including animal sounds and other elements. Preview options are also available at this point, so that you can check and make the modifications you need until you are satisfied. The created ringtone can be saved locally as an

M4R file. Alternatively, you can easily send it directly to your iPhone, iPad or iPod touch, should the device be connected to the computer. A nifty and versatile ringtone creator EaseUS Ringtone Editor is one of the simplest and versatile ringtone creators out there, providing support for locally stored files, as well as SoundCloud and YouTube music. It is easy to use, and it sports a modern-looking wizard-based interface that allows you to quickly transform any music file into a ringtone. All in all, if you are looking for a ringtone generator or converter, it is one of the tools you should definitely try.
