FASTER is designed for frontend only How to start – what to choose? I've chosen a hand drawn look for the first version of the FASTER tool. I wanted to create a tool that would be fairly new looking at first and that I, as a designer, could easily adapt to any FASTER theme I want. A digital tool would be great too – one that has even more options – but I really like the idea of how simple the tool would be when starting with a hand drawn look. The font – where to get it? I've used the font here for the title only. You can use whatever font you want – it's just an option in the tool itself. Also, the font in the tool can be up to 500px high and that, in my opinion, works well for all screen sizes. The FASTER tool itself – what's inside? The FASTER tool can be easily made any colour, gradient, background, etc. It's pretty flexible when it comes to the look of it. But, what's inside it? Let's first take a look at the top part bc9d6d6daa
