FIFA (from Formation, Attacking, & Finishing) is where the magic happens. FIFA is a celebration of the beautiful game – the people, the history, the stadiums, the skills, and the passion. We are committed to creating the most authentic football experience possible, as if you were there in the stadium on matchday, experiencing what the real players, fans and spectators feel like every week. FIFA is sports by the people, for the people. Everyone is invited to join the party. FIFA is what matters most. EA SPORTS FIFA 22 introduces a key new feature called the "Player Impact Engine", which allows the game to simulate nuanced moments of influence that create ripples through the entire pitch. EA SPORTS FIFA 22 introduces a key new feature called the "Player Impact Engine", which allows the game to simulate nuanced moments of influence that create ripples through the entire pitch. The Player Impact Engine It's the moment when everything changes. Whether you're on the defensive line, in the opposition goal or have just entered the penalty area, it's the most important moment in any match - the moment your player has a significant impact in the result of the game. The new Player Impact Engine allows us to more realistically simulate the effect of actions and situations on the pitch – creating ripples through the game. This allows us to more accurately model the dynamics of how players pass, attempt to score and then react to moments of influence. Players and coaches make decisions based on their knowledge of how their team works and what is in front of them. This new feature gives players more understanding of their teammates and opponents, making it even easier for them to make their best decisions in important moments. Players will be feeling the effects of these moments like never before, giving you a better view of the game and impacting your decisions even further. The Player Impact Engine integrates into the new animation system, which now improves the impact of every single tackle, pass and tackle attempt, as well as dribble, on and off the ball. All of this leads to a much more believable, authentic and strategic football experience. Teams can now be fully described on the Global Team Manager screen. With Player Tracking, clubs can track the position, performance and physical condition of their players around the world. New score bc9d6d6daa

Everything is improved, the gameplay is amazing, it has miles more players and a revolution in fifa 15 is about coming back as one of the biggest sports games on the planet. I'm already an avid fifa player but I'm seeing a game that has changed and hopefully will surpass fifa legends and the real deal ultimate team. The driving is awesome, the pitch is more realistic, and they've finally brought back the traits that made the original a classic.
