HyperMotion includes four new game modes: "Story Mode," "Tactical Mode," "Shot Intelligence" and "Quick Play." In Story Mode, which presents a series of increasingly difficult scenarios, gamers will take control of a Real Madrid squad, comprised of legendary players from around the world. Collected data is used to create an alternate reality where Real Madrid athletes execute personalized simulations, which advance and change as you progress through the game. In Tactical Mode, players will take control of a custom-made player, including attributes such as height, speed, technique and decision making. Tactics and tactics adjustments can also be made to alter player performance and rewind the story. In Shot Intelligence, players will be able to launch shots and score from distance with more accuracy. And in Quick Play, players can choose from a variety of events to take part in.
