I'm looking for korg style works patch for Jam. I'm not sure which one. I have heard that it's a bit limited? For example, you can't add your own styles for instruments. The sounds are just the preprogrammed ones. Buy StyleWorks XT Music Works for Windows for $39.81 Powered by UniKluster.com I love the interface. It is easy to use, easy to edit, and I can jam with it on a live set.. I am using it with the Roland VPC-3, and I love it for the Roland sounds. I am very happy with it.. I've used "Roland's

Custom" in the past, and liked it, but I prefer this. There's no menus or anything like that on the windows. I'd like to be able to use it for MC and show tunes as well.. I can't find a free or used version of this online anywhere. Am I missing something?. This is the sort of thing that works great for folks who work at a recording studio and don't want to spend the time to learn a DAW and MC... The customer service at the store that sold this to me was great. They put me on hold for 30 minutes as they tried to get a 1 year warranty to work. They called me back and told me they could send it to me under the 1 year warranty, but I'd have to pay for shipping and they couldn't guarantee it was going to work on MC. I told them, "No problem, if it doesn't work, I'll give you $100 back." That worked. :) " I'm

not a Mac user, but I do use Logic on the PC. I do this under the 'close' method that
