The present invention is particularly suited for use on a firearm such as a rifle, although it is also suited for use on a handgun. Variable angle telescopic sights have been in use for some time, and many such sights are adapted for use on firearms of various calibers. Generally, the rear portion of the rear of the sight is hinged to permit rearward and downward movement, and the adjustment of the sight is effected by the movement of the sight over the firearm. A number of such sights are disclosed in the patent literature. For example, U.S. Pat. No. 5,344,003 shows a variable power telescopic sight where the front portion of the sight has a lens that is moveable along a vertical path of travel. A somewhat complicated rear sight is shown in U.S. Pat. No. 5,421,692, where the rear portion of the rear sight is adjustable along a vertical path of travel. A bullet drop compensator is attached to the front end of a sight frame. A detent lever is pivotable along a vertical path of travel and is moved by movement of the sight frame. 10828168432201-0816-00A03.DOCX1442.16 KB A man no longer has the power to be an atheist...Today, for example, I saw Zembla (in Flanders) to be eloquent about the Millenarianism of the Roman Church. And it's not because he's a Jew (which I am quite sure he isn't) that he gave that sermon which is worth reading, but because he's a rationalist and a Freemason! There is none in this world today that can uphold non-belief. Even the most courageous man cannot.A.D. — 8th of Barmstone, 1850.Man is thus no more than a sounding-board of atheism. And for this reason he is branded as an "evil spirit." A haven of tolerance!This is the new asylum you want! Why? Because they don't waste their time proving that faith is true? No, they try to prove that it isn't. But why treat the worse the better? Because, let's be frank, that's the easiest way to prove to yourself that you're right!Yes, they're all mad!And so we have to live as their patient, at the same time:Keep talking, keep talking, keep talking, and we too will come to talk about the virtues of Morality! Keep preparing for the great social experiment! All this will be useful in the teaching of philosophy, for you never learn anything without a teacher! As for us, well, we've made our choice and there's no doubt of it! First of all, we want our rights. The state promises us the study of philosophy! The state also promises us the right to free association:If the state could do this, it would have nothing more to do! The state promises us the right to treat women without respect! It promises us the right to be exclusive and even intolerant! The state promises us the right to set up as many prisons and as many places of torture as it likes! And especially the right to set to one side all man's sense of justice in its associations! Now you'll see why all the truths we hold true do not allow us to do this! All this will be useful in the teaching of philosophy, for you never learn anything without a teacher! As for us, well, we've made our choice and there's no doubt of it!
