"The art and gameplay are no different from those of its predecessor, Final Fantasy Tactics, and I absolutely enjoyed the game. I also enjoyed the addition of the Online elements which can make the game play different each time you play. Even though some things in the game will feel familiar to you, there are also many new elements that make the game very enjoyable. The battle system, as well as the interface were used smoothly and I never noticed any slowdown. I would recommend this game to any fans of the genre of Final Fantasy Tactics. If you own the previous Final Fantasy Tactics game, then this game is definitely worth looking into. If you have never played it before, I would recommend looking into this game. The price is steep, but the game is well worth it for the price and you can say it is worth paying that much. The game is very easy to understand, a turn-based RPG where you play a map to find the enemies and use the action commands to defeat them. Even though the story is kind of unknown, the gameplay is easy to pick up and play. I definitely recommend this game."- Mario Magrino "I played a lot of turn-based tactical RPGs. It always feels great to be able to explore a new world. Both the story and the gameplay, I enjoyed it a lot. There's lots of content and little fan service. I think this game will be great for those who enjoy turn-based tactical RPGs and for those who would like to play Final Fantasy Tactics without paying a ton. Even though this game is similar to Final Fantasy Tactics, it has some differences that make it a more enjoyable game to play. The story is almost totally unknown to the players. Some people will be disappointed that there is no main character."- David Kim "The story is basically a fantasy version of Seijuu No Kiba. I've never played the original Seijuu No Kiba so I don't really know what to compare it to. However, the battle system is almost completely the same. I was a big fan of FF Tactics. It has always been a good game and I never had any complaints about it. I can see some of the similarities to this game. I was surprised that there were so many differences, but I also enjoyed how much I was able to make my own adventures in this game. I was also happy that I could play it again. I would recommend this game to all the FF Tactics fans out there. Fans bff6bb2d33
