History AutoCAD Serial Key started out as a user-mode app. The first version of AutoCAD ran as an app with the DOS operating system that included Windows 3.1. These versions were slow compared to their mainframe and minicomputer counterparts, but also ran on desktop PCs. The advent of Windows NT (3.1) prompted Autodesk to develop the first version of AutoCAD for the OS. AutoCAD '97 was the first version of the product to run under Windows NT, and in 1994 AutoCAD 2.0 was the first version of the product to run natively under Windows 95. Autodesk was bought by the private equity firm (Dell) in 2006 for $5.4 billion. This ownership change from a software company to an IT company resulted in Autodesk dropping support for the Windows XP operating system on January 1, 2015. At the end of 2015, Autodesk announced that it was discontinuing the 2D product lines, including AutoCAD, AutoCAD LT and AutoCAD Map 3D, in favor of a focus on 3D. In January 2016, Autodesk announced that it would also discontinue Caddie and AutoCAD Map 360. Supported Operating Systems Up until March 2013, Autodesk only supported the Windows operating system (since then they added Mac OS and Linux). AutoCAD 2016 was the first release of AutoCAD to support the following operating systems: Windows 7, Windows 8.1, Mac OS X v10.5 (Mountain Lion), and Windows 10.
