AutoCAD is a sophisticated engineering, design and drafting
application for creating 2D and 3D models, designs and drawings,
and features many "drafting" and "visualization" functions. It was
initially developed as a desktop app running on microcomputers
with internal graphics controllers. Before AutoCAD was introduced,
most commercial CAD programs ran on mainframe computers or
minicomputers, with each CAD operator (user) working at a
separate graphics terminal. History Autodesk first developed
AutoCAD in 1982 for the Apple II, a popular platform for early home
computer users. Autodesk originally developed AutoCAD for the
Apple II because CAD software was not available for the platform.
AutoCAD was one of the first Apple II CAD programs, and Apple IIs
sold as the primary platform for new AutoCAD releases. When
Autodesk first released AutoCAD in 1982, the application was
designed to support standard-resolution fixed-format graphics
displays, such as those found on the Apple II. The release of the
third generation Apple II (known as the Apple IIc) in 1984 allowed
for the release of the application to run natively on that platform,
and for it to support higher-resolution graphics. The 1982 release
was the first public release of AutoCAD for non-Apple platforms, as
well as the first release of AutoCAD to support standard resolution
displays. The Apple IIc allowed for a higher resolution graphics
screen, which AutoCAD could support. Image courtesy of Autodesk
When the Apple IIc first released, it shipped with a 256K graphics
screen, which was comparable to the resolution found on the Apple
II's 512K display. The new screen allowed for AutoCAD to display

graphics at a resolution of 512 by 512 pixels. The 512 by 512 pixel resolution was also the resolution of the Windows-based Apple IIc operating system, so by offering a screen at that resolution, the Apple IIc was able to support a greater resolution than previous Apple II platforms. Although the Apple IIc included built-in graphics capabilities, it was not as powerful as an Apple II with a graphics card that allowed for high-resolution graphics. To fully support a higher resolution screen, a graphics card was required. The Apple II series were not always sold with such cards; when the Apple II was upgraded to the Apple IIc model, it did not come with a graphics card, so it was unable to support a higher resolution

Programming languages AutoCAD supports Visual LISP and AutoLISP. AutoCAD also supports a similar language called Visual Basic for Applications (VBA). Visual Basic for Applications is a Microsoft Visual Basic development environment designed to be used by AutoCAD users. VBA's syntax is very similar to that of AutoLISP. Visual Basic for Applications is also supported in many other CAD packages. Because it is used for data entry, AutoCAD also supports.NET languages: AutoLISP for AutoCAD uses the.NET framework. Visual Basic for Applications uses the.NET framework. Application Designer uses the.NET Framework Finally, AutoCAD allows coding in ObjectARX, a C++ class library. Desktop Applications AutoCAD supports all Windows operating systems from Windows 3.x to Windows 7. AutoCAD LT does not support macOS, Windows Vista or Windows XP. AutoCAD for Linux is available for the distributions of Linux supported by Autodesk. AutoCAD Architecture supports macOS. AutoCAD Electrical supports the same platforms as AutoCAD. AutoCAD Civil 3D has similar support to AutoCAD and AutoCAD LT. Mobile Applications AutoCAD Mobile for iOS supports iOS and Android OS platforms. AutoCAD Architect for iOS supports the iOS platform. AutoCAD LT Mobile supports iOS and Android platforms. I was doing some final revision work for my Calculus 1 course, and came across this

question: If f is a C^1 function with a point of differentiability a, does it necessarily follow that $f'(a) = 0$? I know that it is true that the first derivative is the same as the rate of change with respect to x for all x in the neighbourhood of a. So it follows that if $f'(a) = $ af5dca3d97

Source: The most recent addition to our collection of OnePlus 5T reports, the Redmi Pro 5A has been spotted on TENAA, confirming the device's launch. The Redmi Pro 5A will be the first redmi device in the company's range, as the Pro 5T will come in black and white variant. The phone is also set to launch in China tomorrow, Friday, August 12, and is expected to be priced around 799 yuan (~$117). This is a largely updated version of the Redmi Pro 5, with an octa-core Qualcomm Snapdragon 450, 3GB RAM, a 5.5-inch display with a notch at the top, 13MP + 5MP rear cameras and a 5MP front camera. It features a metal body and the same color choices as the Redmi 5, with black and grey as the available options. We expect the new Redmi Pro 5A to offer the same 16GB of internal storage with no additional RAM or storage expansion. The larger Redmi 5T will most likely come with 4GB RAM and 64GB of internal storage.Amanda Keller, a teacher at the University of New Hampshire, has resigned after apologizing for a Facebook post in which she referred to first-graders as "cows" and "smelly." The following statement, released by the university, explains her departure: Amanda Keller, a former teacher at the University of New Hampshire, has resigned. The university appreciates her contributions and is sorry that her resignation is necessary. The university has not yet determined the date of her last day of employment. In a now-deleted Facebook post on May 3, Keller wrote, "These little shits smell like farts today. That's ok, the cows don't give a shit. I won't either." The comment was published on a student's post about a recent math lesson. Keller is the second UNH teacher to depart after the university discovered a post she made on Facebook. The post, which was deemed inappropriate, also included a comment about students' dress. As for Keller's comment about students, the university says she's no longer allowed to be a teacher or
