The course is in 4 parts, each divided into chapters. I hope that this course will be simple and useful enough for beginners, but certainly for people who know the basics, it will be very useful. Part 1 You will learn how to draw with the software. Part 2 I'll show you how to do this with Photoshop. As you can imagine, this can be quite complicated and time consuming, so I highly recommend that you find and study some guides and lessons. I also want you to read and learn some useful features in Photoshop. I will explain every function in Photoshop that I have seen, and I will show you how to use them to work on your painting. For example, I'll show you how to use the painting tools. You can use these tools to paint and retouch your photos. Brush Tool. The brush tool is a painting tool that allows you to simply select a color from the palette and paint with it. You can also change its brush size on the keyboard, so you can draw small details. Brushes can also be set to automatic, which means that they will paint at the speed you choose. There are two colors in the tool palette. One is used for drawing and the other is used for filling. In this tutorial, we're going to use the color that will be used to draw and then we're going to add text on top of that. There is also a small library with brushes that makes working with colors easier. In this part, we will create a simple outline and add text to the outline. Step 1: Create a new document of 500x500 pixels. Select the Pen Tool (P), and create a new layer. Name this layer "outline".
