Adobe Photoshop CC 2017 is faster than previous versions and toolset is more standardized in terms of importing and exporting options. The latest release gives users an easier time designing logos and branding quickly, because the various effects and layers are now stored in layers as part of the file, and don't need to be dragged out separately during editing. Photoshop CC 2017 has a couple of new tools, like the new Adjustment Layers. These Layers offer advanced tools like leveling, adding gradients or tones to areas of the image and controlling levels of the entire image at once.
