I found that if you zoom in on an image using the Zoom tool, you get the best results with the grid view, even on the Mac version of Photoshop CC. Take a look at the PDF file when you have access to Photoshop CC. **UPDATE** 9/27/2017 : Adobe has now incorporated more complicated versions of the Vivek Pathak ("Improves Photoshop Touch") lens correction feature. You can see how to use it in the steps below: If you use Adobe Color for your RGB projected [1] images in Photoshop, you'll be pleased with the processing the update delivers. You can see in the example below that both the background and the foreground now look more accurate. Adobe must have added a new Sharpen filter or something for this to have worked. Even on an image with very little noise, this was just noticeable. Photoshop CC/CC2019/CC2020 If you use Batch Filters in Photoshop, you might need to create a new custom action to handle this update. You can create a new filter that is run when the normal selection is right-clicked on. In this post, I explain the underlying filters, what actions and conditions I chose to use, and how to apply the action to your project. The project I'm using for this example is a studio portrait with the background I created. I built a simple lighting setup and shot it at ISO 400. I rendered it in Speedgrade, and the edit wasn't too different from your standard SR workflow. I did use the Sharpening action from the upcoming **Sharpening & Clarity** PP. I had used the plugin to remove the camera and lens vignette. I didn't need to use any additional sharpening. I didn't use any noise reduction. I thought the tone mapping was fine, as it didn't overpower the other tones on the hair. I enlarged the canvas to 1920 pixels and lowered its Saturation, Contrast, and Brightness in Edit > Adjustments to bring down the overall tonal range. I applied a Multiply Blur Filter via Layer > Blur > Gaussian Blur. I added a layer mask and did a

Gradient Glow using my top layer gradient as a mask over the whole layer. I then used the Gaussian Blur again, deeming the end result a great canvas for a monochrome image.
